💼 Professional Experience

Software Engineer   05/2022 – present | Bucharest
BearingPoint

- **Position:** Software Engineer at Bearingpoint Navigator Solutions
- **Responsibilities:**
  - Worked as a full-stack engineer using C# for backend, SQL Server for database, and Angular for frontend development.
  - Implemented new features, improved codebase, and resolved bugs and hotfixes.
  - Participated in multiple Software Requirements Documents (SRDs)
  - Optimized data transfer between backend and software to address initial performance issues.
  - Enhanced the functionality of application charts through new feature implementation.
- **Role Transition:** Assumed the role of Scrum Master in the second year.
- **Scrum Master Responsibilities:**
  - Facilitated daily stand-up meetings.
  - Coordinated team efforts and ensured project progress.
- **Key Skills Utilized:**
  - **Technical proficiency** in C#, SQL Server, and Angular
  - **Effective communication** and **problem-solving**
  - **Leadership** and **organizational skills**

.NET Developer   02/2020 – 05/2022 | Bucharest
TechnoHub

Project name: "IGI - GII Portal application" ⌞

- **Client:** *IGI (General Inspectorate for Immigration)*

February 2020 – May 2022

Project name: "Meter management system for SMM warehouses"

- **Client**: *Delgaz Grid SA*

February 2020 - May 2022

Project name: "Environment Fund Administration – RABLA Program" ⌞

- **Client**: *Environment Fund Administration*

February 2020 - May 2022

Activities performed

- Designed application structure and how the services were used to save time and writing less code.
- Developing and adapting T-SQL transactions to write & modify data required in this project.
- Using .NET Core API for working with data that is received and sent to Microsoft SQL Database using controllers.
- Implementing responsive UI design in Angular app that was used for Frontend using HTML & CSS & TypeScript.

January 2022 – Present

Project name: "IGI - Desk"

Activities performed

- Integrated devices used in the C# WPF desktop application using their SKD. These devices are: camera, document reader, fingerprint reader and signature retrieval device.
- I developed the way the devices are called, and implemented the customer requirements.

🧠 Skills

C#

T-SQL

TypeScript

Object-OrientedProgramming (OOP)

Angular

HTML & CSS

🎓 Education

Bachelor's Degree: Computer Science
"Ovidius" University

2016 – 2019 | Constanta, Romania

📂 Projects

E-learning system for learning algorithms and data structures, C# | ASP.NETCore MVC | MSSQL ⧉
- WEB application with the objective to provide support for learning of algorithms and data structures
- Developed using Model–view–controller (MVC) architecture
- Designed use-case diagram
- Designed database (MSSQL): User requirements, Conceptual design, Logical design, Physicaldesign, Implementation
- Worked with database using Entity Framework Core Used asynchronous programming using async/await to increase performance and responsiveness
- Used Razor for embedding server-based code into webpages
- Used CSS Framework for developing responsive and mobile-first interface

🏅 Awards

Diploma of participation at ESTIC organized by "Ovidius" University

2018
